Notes:

- Commissions apply to all order types.
- All fees are charged in the currency of the traded product.
- VAT, also referred to as *consumption tax, goods and services tax*, where applicable, will be separately applied for eligible services.
- Modified orders will be treated as the cancellation and replacement of an existing order with a new order. On certain exchanges, this may have the effect of subjecting modified orders to commission minimums as if they were new orders. For example, if an order for 200 contracts is submitted and 100 contracts execute, then you modify the order and another 100 contracts execute, a commission minimum would be applied to both 100 contract orders. Orders that persist overnight will be considered a new order for the purposes of determining order minimums.
- Effective March 1, 2013, certain Italian stocks will be subject to a transaction tax. For additional details regarding the calculation of the tax, please refer [here](#). Effective September 1, 2013, derivatives on those Italian securities subject to the transaction tax will similarly become subject to a transaction tax. For additional details regarding the derivative transaction tax, please refer [here](#).
- The standard commission will be charged for the exercise or assignment of any Futures or Future Options Contract. [Click here](#) for details.
- Single Stock Futures are not available for volume tiered pricing.
